

OPPORTUNITIES
IN HUNGARY

DANISH-HUNGARIAN DISTRICT ENERGY WORKSHOP

APRIL 22 & 23 2018

In cooperation with Danish Embassy in Budapest, and the Hungarian District Heating Association, Mataszsz, DBDH invites you to participate in the 'Danish-Hungarian District Energy Workshop' on 22 & 23 April, with the purpose of promoting Danish district heating and district cooling on the Hungarian market.

THE TRADE COUNCIL

Mataszsz made a survey on the interest for a 'Danish-Hungarian District Energy Workshop' among their members, and more than 90% of them confirm their interest to participate in such an event.

Most important topics are the followings:

- Innovation in the DH sector
- Challenges in DH operation
- Remote control of DH system
- District cooling
- Renewable district energy

The Hungarian District Heating Sector is looking to the Danish systems as a model to follow, and district heating objectives by the Government will promote an increasing role of district heating in the Hungarian energy policy.

A new District Heating Action Plan is under preparation and will focus on four areas:

1. Use of renewable energy
2. Increased energy efficiency
3. Expansion of the district heating market
4. Increased consumer awareness

Also, new heat production technologies will be supported, especially biomass and geothermal projects. Hungary has good potential in both areas.

PROGRAM INCLUDES:

Sunday 22 April

- Arrival to Budapest
- Evening reception at the Danish Embassy hosted by Danish Ambassador Kirsten Geelan.

Monday 23 April

- Danish-Hungarian District Energy Workshop
 - An effective gathering in Budapest of District Heating utilities in Hungary and members of DBDH.
- The general aspects and recent trends of District Heating and Cooling in Denmark presented by Lars Gullev, CEO of VEKS.
- Danish participating companies present case stories and new technologies.
- Networking lunch during the workshop
