

India District Cooling webinar programs

Energy demand for cooling in Indian will increase from 90 TWh in 2016 to 1350 TWh in 2050, becoming the worlds largest cooling market. In 2019, India Cooling Action Plan (ICAP) was prepared by the India Ministry of Environment, Forest & Climate Change, providing a 20-year perspective and outlines actions needed to provide access to sustainable cooling.

The India District Cooling webinars aims to provide insights in the India District Cooling sector, with speeches from city representatives, utilities, IGOs, NGOs and other stakeholders active in the Indian District cooling market.
