

XXIV District Heating Forum in Miedzyzdroje September 12th-15th, 2021 Joint Danish stand – seminars – discussions

It is the pleasure of **DBDH, Danish Embassy in Warsaw** and the **Polish Chamber of District Heating** to invite you to the **25th Forum event for district heating in Poland** in Miedzyzdroje 2021. As the largest and the most recognized district heating sector event in Poland, we expect to see many representatives of all the major heating companies operating in Poland.

For the past 24 years, this event has been organized by the Polish Chamber of District Heating in Miedzyzdroje near Szczecin. In 2019, the number of participants amounted to more than 670 representatives from the district heating sector. The number of participants and exhibitors was reduced in 2020 due to COVID pandemic

As the district heating in Poland is facing the process of transformation also to be supported by the National Recovery Plan, the developments are expected to be discussed during the panel discussions at Forum seminars. The views of the representatives of the Ministry of Climate and Environment, Energy Regulatory Office and National Fund for Environmental Protection as well as the district heating companies will be shared during panel discussions. For this reason, we expect that the forum event - again this year - will be a great opportunity to present Danish technologies and to follow the current developments in district heating in Poland.

XXIV District Heating Forum in Miedzyzdroje

The "Day of New Technologies" will be dedicated to **the latest technological solutions already operating in the industry, as well as visions and forecasts related to future technologies**. The Forum consists of different seminars and debates in parallel with a district heating exhibition, where companies have the possibility of presenting their technological solutions and services. During the forum, the Polish Chamber of District Heating will be handing out the **District Heating Laurels** to companies of special distinction in the field, for a number of categories.

Are you interested to participate the joint Danish stand during the XXV District Heating Forum ?

We have made a prebooking for up to 40 m2 of exhibition space, which can be shared by up to 10 companies. The total exhibition area will be flexible according to the number of participating companies.

Why participate?

Participating at the joint Danish stand will give your company the full advantage of the Danish brand and attract attention from the Polish audience who are aware of the quality of Danish solutions and technologies.

We will offer one large stand fully equipped including refreshments for excellent networking possibilities.

You will also be able to participate in the Day of New Technologies presenting your company's know-how and technical solutions (optional).

Who will you meet?

The District Heating Forum in Miedzyzdroje is the largest event of the heating sector in Poland, and is attended by representatives of all major heating companies operating in Poland. The Forum event is an opportunity to exchange views and look at the current situation in district heating, as it consists of seminars and debates in parallel with a large district heating exhibition.

The Danish stand is placed in a very central place at the Pavilion, where the opening of the exhibition takes place.

This year, we are present for the fifth time, and we experience more and more visitors who come to meet us. We have previous times successfully arranged a very popular lottery at the Danish stand, which will be repeated this year as well. All contacts made at the Danish stand are saved and distributed to the Danish companies after the exhibition.
