### Thursday the 17<sup>th</sup> of November

- All day Travel to Denmark or individual meetings

**Nakheel** is the one of the largest developers in Dubai and is behind world-famous projects such as the Palm Jumeirah. Developers are becoming increasingly aware of the advantages of reliability of district cooling service, hence Nakheel is always looking to improve its district cooling solutions.

**Emirates Central Cooling Systems Corporation (EMPOWER)** claims to be the world's largest district cooling services provider in terms of capacity. It has a district cooling capacity of approximately 1 million Refrigeration Tons (RT) and over 70% market share in the UAE. Empower is the provider of services to the Palm Jumeirah among others.

**Arabtec** is a leading contractor in the UAE, in operation since the 1970s. They are considered to be a leading single EPC contractor with standalone specialities. Arabtec has e.g. executed a number of high-profile construction projects, such as Burj Khalifa (the tallest building in the world), the fit out of Burj Al Arab, Terminal 1 of Dubai International Airport and passenger terminal of Dubai World Central International Airport.

**Emirates District Cooling (Emicool)** is one of the leading district cooling service providers in the United Arab Emirates. Emicool has six strategically located operational plants with capacity in the excess of 330,800 RT including reticulation pipe network and energy transfer stations. The company is keen to expand its operations throughout the region.
